

Accuracy and automation for marketing flight assignment and synchronization.

Sabre AirVision Codeshare Manager

Are Your Marketing Flights Published Accurately?

As your network expands, both through operated and codeshare flights, managing the network through a wide range of schedule changes becomes more difficult. You may wonder, are the marketing flights getting updated accurately as the operating schedules change? If not, you may have multiple situations where passengers miss their connections, services are sold on flights that no longer exist, or you lose revenue from misconnects with your partners' flights.

Getting The Most Out Of Your Codeshare Flights

At every step of a codeshare relationship, especially with limited codeshare flight numbers or opportunities available, it is critical to optimize your operating flights to match your partners' schedules to maximize connections and consequently bookings.

When operating schedules change, it's important to make sure your marketing flights adjust accordingly so connections remain legal. With *Sabre® AirVision™ Codeshare Manager*, you can do this quickly and effortlessly, minimizing passenger reaccommodation costs, and offering new services for sale faster.

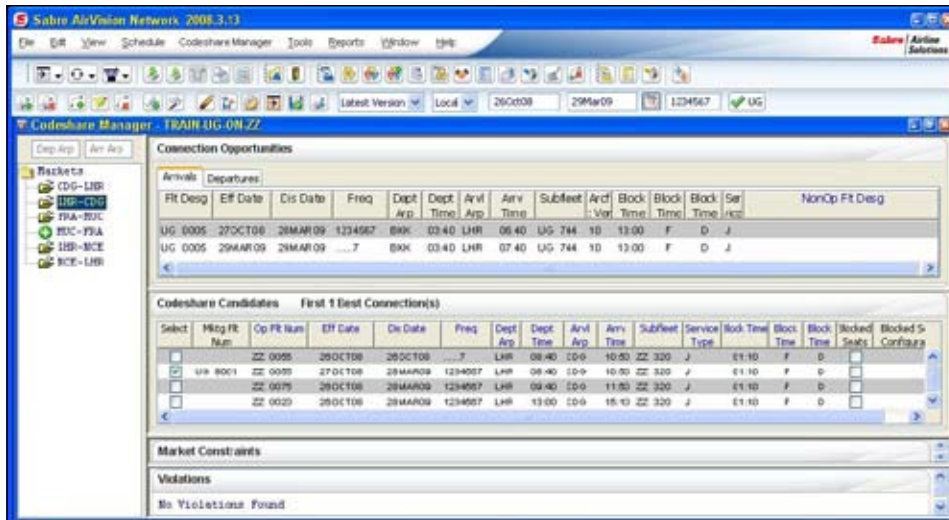

Figure 1 **Codeshare Manager** helps you to quickly identify and correct codeshare synchronization problems.

Benefits

Reduced Errors Ensures that marketing flights match operating flights and alerts you to changes in the schedule that could result in passenger connection problems.

Increased Productivity Reduces the time required to set up and publish codeshare flights by automating most aspects of the codeshare management process.

Fast Response To Rescheduling Quickly detects changes in the operating carrier's schedule and automatically updates marketing flights within the parameters of a partnership.

Competitive Advantage Determines the best connecting flights so you can quickly identify and take advantage of new or alternate codeshare flight opportunities.

Shared Schedules And Efficiency Shares schedules and supporting data across the Sabre® AirVision™ platform so you do not have to transfer schedules or data between systems. Schedule publication is accomplished in a consistent way for both operating and marketing flights.

Features

Codeshare Manager provides options and features to support different ways of working with different codeshare partners. Using *Codeshare Manager*, you can:

- Maintain several different marketing flight relationships with multiple airline partners,
- Find best connecting opportunities between your flights and your partner's flights,
- Automatically generate marketing flights for specified markets,
- Automatically generate marketing flight numbers based on rules for the partnership,
- Regularly and automatically update the partner airline's schedule,
- Automatically detect changes in the partner airline's schedule,
- Export schedules with marketing flights to distribute to partners and publish in reservations systems.
