

Improving on-time performance and increasing aircraft utilization with significantly reduced costs

# Sabre AirCentre Movement Manager

## Managing Efficiently For Success

Effectively managing daily flight operations is often a key to an airline's success. Faced with daily disruptions, as well as the need to improve operational efficiency and increase aircraft utilization, the role of operational controllers is more demanding than ever.

Airlines need to aggressively streamline workflows, eliminate repetitive tasks and significantly reduce the time needed to make precise, informed decisions that directly impact the bottom line.

## Integrating And Automating

*Sabre® AirCentre™ Movement Manager* provides a total flight operations

management solution that meets the needs of all airlines facing complex operational challenges. This fully integrated solution gives operations controllers a complete view of flight and maintenance schedules, load weight, crew connections, passenger information and more.

Through automated rule-based tail assignment and messaging, controllers can focus more time on effective disruption recovery and strategic, forward-looking decision making. Business processes are further streamlined through visual alerts that give controllers immediate insight into the nature of the problem, with simplified controls for evaluating the best alternatives and quickly making the required changes.

*Movement Manager* is the only complete flight operations solution that truly delivers on its promises.

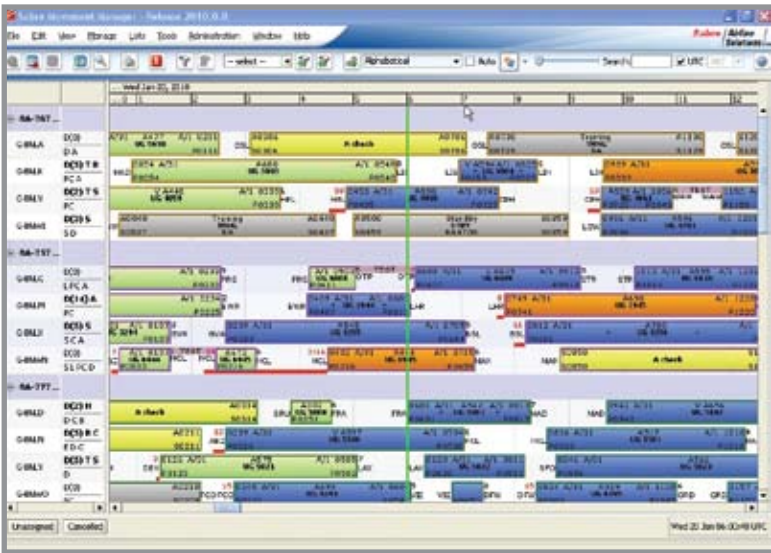

Figure 1 Sabre AirCentre Movement Manager offers an intuitive Gantt chart, displaying flight information.

## Managing With Ease

*Movement Manager* features a contemporary GUI capable of displaying thousands of data points in a single time-oriented view. Advanced filtering, grouping and sorting controls, as well as powerful search capabilities, make navigating complex flight schedules fast and efficient. With an emphasis on rich interactivity and menu-heavy navigation, the solution frees users to focus on solving problems.

## Boosting Performance

Using state-of-the-art technologies creates an extremely stable environment, perfectly suited to the high-performance demands of 24/7 operations. Its client-server architecture with active load balancing supports a large number of users without degrading performance.

Fully integrated with the Sabre® ASx<sup>SM</sup> Airline Services Exchange, *Movement Manager* offers you flexible rules-based messaging that reduces communication costs and enables easy integration with third-party applications and legacy systems.

In short, the ASx exchange supports your airline's future growth and evolution.

According to Gulf Air, Bahrain's leading air carrier, the carrier reduced costs by more than US\$1 million over a one-year period and improved its on-time performance by 7 percent by using *Movement Manager*.

## Key Features

- Intuitive and consistent user interface,
- Flexible business-rules management,
- Web-based anywhere, anytime access,
- Optimized tail assignment,
- What-if and scenario management,
- Manage by exception using user-defined alerts,
- Just-in-time automated information exchange,
- Advanced messaging with SMS and e-mail support,
- Information for proactive decision making,
- Comprehensive audit trail.

## Our Unique Experience

At Sabre Airline Solutions®, our team of experts is ready to help power your progress by lowering your costs and generating more revenue for your airline. And with our comprehensive portfolio, you can market your experience, sell your product, serve your customers and operate efficiently across your entire airline.
