

The Most Reliable, Comprehensive And Integrated Resource Management Solution Supporting Airlines, Airports And Ground Handlers

# Sabre AirCentre Airport

## Sophisticated Solutions

*Sabre® AirCentre™ Airport* is an integrated end-to-end resource management solution designed to handle the needs of airlines, ground handlers, airports, caterers, cargo handlers and airport-based government agencies.

## Established Expertise

*Sabre Airline Solutions®*, a *Sabre Holdings®* company, helps airlines and airports better serve their customers and operate more efficiently. More than 250 airlines and 100 airports around the world use our broad portfolio of solutions and have turned to our consulting group for strategic, commercial and operational consulting.

## Real Results

Our resource management systems can dramatically improve day-to-day operations across the airport operation by providing optimal staffing levels, generating rostering solutions for complex scenarios, automating employee administration and offering real-time decision support and disruption recovery on the day of operation.

### Track and manage resources automatically

On the day of operations, the real-time management tools monitor the incoming flight schedule and other factors that might impact or disrupt airport operations. As changes occur, the solution can automatically respond and adjust resource allocations as defined by your company's rules, or it will alert the operator to specific changes such as flight delays or gate changes.

### Access an economical hosted solution

Our industry-leading, economical Software as a Service solution provides access to our superior applications while leaving the burden of IT support to us. This SaaS delivery method is a complete "application + hosting" solution, which includes hardware and management services, Sabre Airline Solutions and third-party software, and help desk and maintenance support.

## Benefits

**Easily meet demands with optimal resource planning and rostering** Sabre AirCentre Airport offers forecasting and planning tools that use demand-driven resourcing to determine the most efficient resource levels, including airport staff, gates and equipment, required to meet the work demands for a given flight schedule. Additionally, it uses an industry-leading roster optimizer capability for defining standard and complex scenarios based on company bargaining agreements.

**Streamline resource administration** Streamline the entire administration process by providing managers and supervisors with a powerful tool that centralizes all employee information and assists in tracking employee schedule changes such as vacation, training and overtime. The Web-based employee self-service portal enables your employees to request, view and execute many standard transactions including shift trades, swaps and vacation requests online, which can be processed automatically according to your company-defined rules.

## Features

- Airport staff, gate and equipment planning,
- Roster optimization for standard and complex bargaining agreements,
- Staff administration and employee self service,
- Gate management including terminal and remote parking assignments,
- Real-time staff tracking and task communication,
- Automated disruption recovery on day of operations.

## Our Unique Experience

At Sabre Airline Solutions®, our team of experts is ready to help power your progress by lowering your costs and generating more revenue for your airline. And with our comprehensive portfolio, you can market your experience, sell your product, serve your customers and operate efficiently across your entire airline.
