

Web-based, fully-integrated in-flight business solutions with proven results

# Sabre AirVision In-flight

## In-flight Challenges

In-flight catering management entails numerous challenges. It's more than just reducing meal wastage and managing costs. It's also getting the right service on the right flight, every time. It's managing volumes of information from numerous, disparate sources. It's coordinating across internal departments, caterers and service providers around the globe. Finally, it's optimizing every piece of the equation, from use of airline-owned assets, to effectively handling daily operational changes, to ensuring that invoices match the services provided.

## Sophisticated Solutions

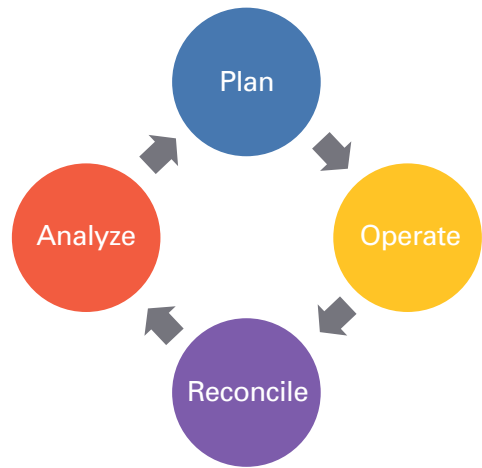

*Sabre® AirVision™ In-flight*, a component of *Sabre AirVision Marketing and Planning*,

offers market-leading capabilities. Our modular, Web-based solution streamlines catering processes by reducing meal wastage, automating back-catering opportunities, handling close-in operational changes, optimizing airline-owned asset inventory levels, providing centralized price controls and fully automated, 100-percent invoice auditing. The solution facilitates and integrates departmental interaction across business units and with your catering suppliers. Spanning the full breadth of planning and operations, the *Sabre AirVision In-flight* solution integrates multiple systems onto a single platform and automates your business processes freeing you to focus on strategic decisions.

## Real Results

Implementation of the full *Sabre AirVision In-flight* solution has consistently proven to reduce costs by up to 10 percent of the total catering budget.

Our consultative implementation process drives tangible business value and ensures full adoption through our focus on solution consulting, delivery and knowledge transfer.

**Sabre AirVision In-flight:** End-to-end solution addressing each of your in-flight service business processes

## Benefits

**Increase efficiency** Automates manual processes, interfaces with disparate systems, streamlines workflows and coordinates intra-departmentally through a centralized toolset for airline, caterer and supplier users worldwide,

**Reduce in-flight service expense** Provides savings through reduced meal wastage, optimized back catering, decreased inventory levels and robust financial controls. In-flight business intelligence tools provide visibility into financial and operational data,

**Streamline operations** Centralizes communication of service changes and automates service adjustments resulting from operational changes,

**Lower IT costs** Eliminates upfront capital costs. Offered through our world-class *Sabre® eMergo® Web Access* environment, you incur no upfront capital costs and are freed from the burden of added IT expertise. Our inclusive access fee pricing incorporates hosting, maintenance and regular application updates,

**Modular approach** Available in different configurations — from stand-alone meal order forecasting to the full end-to-end solution — with implementation phases designed to provide an accelerated ROI by focusing first on the greatest savings opportunities.

- Offers sophisticated tools to support collaborative menu development, an online specifications catalog, rules-based automated allocation of services to flight schedules, optimized back catering and drag-and-drop galley load planning,
- Uses the industry's most sophisticated, self-learning, meal-forecasting algorithm, reducing the over-boarding of passenger-sensitive items,
- Utilizes standard interfaces to flight schedules, reservations, departure control, operations, financial, ERP and other core operating systems,
- Forecasts usage requirements of airline-owned products, automatically recommending optimal reorder quantities,
- Supports auditing of 100 percent of catering invoices incorporating airline-specific rules and tolerances, reducing occurrences of overpayments.

## Features

- Delivers a complete solution that spans all aspects of service planning, meal-ordering forecasting, operations, materials management, financial controls and analysis,
- Facilitates using service partners or caterers that best meet your needs at each location, without being constrained to using proprietary systems,

## Our Unique Experience

At *Sabre Airline Solutions®*, our team of experts is ready to help power your progress by lowering your costs and generating more revenue for your airline. And with our comprehensive portfolio, you can market your experience, sell your product, serve your customers and operate efficiently across your entire airline.
